

SITRANS L Level instruments

Continuous measurement - Ultrasonic transducers

Echomax XRS-5

Overview

Echomax® XRS-5 ultrasonic transducer provides reliable, continuous level monitoring of liquids and slurries in narrow lift stations/wet wells, flumes, weirs and filter beds using a beam angle of just 10° and a CSM rubber face.

Benefits

- Narrow beam angle of only 10°
- Chemically resistant PVDF copolymer enclosure and CSM rubber face
- Measuring range: 8 m (26 ft) for measurement of liquids and slurries
- Fully submersible: IP68 degree of protection
- Easy installation with 1" NPT or 1" BSPT connection

Application

The XRS-5 is non-contacting with a measuring range from 0.3 to 8 m (1 to 26 ft). Advanced echo processing ensures reliable data even in conditions with obstructions, turbulence and foam.

The hermetically sealed CSM rubber face and the PVDF copolymer enclosure are designed for maximum resistance to methane, salt water, caustics and harsh chemicals common to wastewater installations. With an IP68 degree of protection, this rugged sensor is fully submersible in the event of flood conditions. Use a submergence shield if full submergence is possible in the application. A submergence shield will maintain a high level reading output during submerged conditions.

The low-cost XRS-5 transducer is compatible with a full range of Siemens Milltronics controllers, from a basic system for high/low alarm or simple pump control, up to advanced control systems with communications, telemetry and SCADA integration capabilities.

- Key Applications: wet wells, flumes, weirs, filter beds

Technical specifications

Mode of operation

Measuring principle Ultrasonic transducer

Input

Measuring range 0.3 to 8 m (1 to 26 ft), dependent on application

Output

Frequency 44 kHz

Beam angle 10°

Accuracy

Temperature error Compensated by integral temperature sensor

Rated operating conditions

Vessel pressure Normal atmospheric pressure

Ambient conditions

- Ambient temperature -20 to +65 °C (-4 to +149° F)

Design

Weight (Approximate shipping weight of sensor with standard cable length.) 1.2 kg (2.6 lbs)

Material (enclosure) PVDF copolymer enclosure and CSM face

Process connection 1" NPT or 1" BSPT

Degree of protection IP68

Cable connection 2-core shielded/twisted, 0.5 mm² (20 AWG), PVC sheath

- Cable (max. length)
 - 365 m (1200 ft) with RG 62 A/U coaxial cable
 - 365 m (1200 ft) with 2-core twisted pair, foil shield, 0.5 mm² (20 AWG), PVC sheath, only for SITRANS LUC500, MultiRanger 100/200

Options

Flange version Factory flange with PTFE face for ASME, DIN or JIS configuration

Flange adapter Split flange (field mounting) for ASME, DIN or JIS configuration

Submergence shield For applications with flooding possible

Certificates and approvals

CE (EMC certificate available on request), CSA Class I Div. 2, FM Class I, ATEX II 2G, SAA Ex s Class I
