

## **E-Series Ultrasonic Meters**

### **Programming Software**

## DESCRIPTION

The E-Series Ultrasonic Application has the ability to modify the 35-day alarm settings on E-Series Ultrasonic meters programmed to either RTR or ADE protocol.

The software runs on a laptop and uses an IR programming head to modify the status of the following alarms to allow reads to be sent:

- Exceeding Maximum Flow
- Low Temperature

The following sections explain how to quickly install and start using the software application.

#### **Parts List**

Included in the kit:

- Application software CD (68027-001)
- Programming manual

Additional parts required:

- Customer-supplied IR communication cable 64436-023
- USB to Serial adapter 64436-029

## **INSTALLING THE SOFTWARE**

This section describes how to install the E-Series Ultrasonic Programmer software.

1. Insert the CD-ROM containing the software and double-click the **setup.exe** file. The *Welcome* screen displays. Click **Next**.

2. Accept the terms to the license agreement and click Next.

3. At the *Customer Information* screen, fill in the fields and click **Next**.

4. Click Install to begin installing the software.

# **Programming Manual**

5. The InstallShield Wizard displays the installation status.

6. When the installation is complete, select **Finish** to exit the Wizard.

## **USING THE PROGRAMMING SOFTWARE**

- 1. Connect the IR reader to the computer.
- 2. Double-click the E-Series Ultrasonic Programmer desktop icon.

3. The first time you launch the program, the *License Agreement* displays. Read the agreement and click **Accept License**. If you select **Decline License**, the program will not start.

4. Enter a three-character User ID in the box and click **OK**. Any three characters will open this application.
