

DESCRIPTION

The ModMAG® M1000 Electromagnetic Flow Meter is the result of years of research and field use of electromagnetic flow meter technology. Designed, developed and manufactured under strict quality standards, the M1000 features sophisticated, processor-based signal conversion with accuracies of ± 0.3 percent.

The M1000 can be chosen for a broad spectrum of applications and the wide selection of liner and electrode materials provide maximum compatibility and minimum maintenance over a long operating period.

OPERATION

The operating principle of the electromagnetic flow meter is based on Faraday's law of magnetic induction: The voltage induced across any conductor, as it moves at right angles through a magnetic field, is proportional to the velocity of that conductor. The voltage induced within the fluid is measured by two diametrically opposed internally mounted electrodes. The induced signal voltage is proportional to the product of the magnetic flux density, the distance between the electrodes and the average flow velocity of the fluid.

ELECTRODES

When looking from the end of the meter into the inside bore, the two measuring electrodes are positioned at three o'clock and nine o'clock. As a conductive fluid flows through the magnetic field, a voltage is induced across the electrodes. This voltage is proportional to the average flow velocity of the fluid and is measured by the two electrodes. This induced voltage is then amplified and processed digitally by the converter to produce an accurate analog or digital signal. The signal can then be used to indicate flow rate and totalization or to communicate to remote sensors and controllers.

The M1000 Electromagnetic Flow Meter also has an "empty pipe" detection feature. This is accomplished with a third electrode positioned in the meter between twelve o'clock and one o'clock. If this electrode is not covered by fluid for a minimum of five-seconds, the meter will display an "empty pipe" condition. When the electrode again becomes covered with fluid, the error message will disappear and the meter will continue measuring.

DETECTOR

The flow meter is a stainless steel tube lined with a non-conductive material. Outside the tube, two DC powered electromagnetic coils are positioned opposing each other. Perpendicular to these coils, two electrodes are inserted into the flow tube. Energized coils create a magnetic field across the whole diameter of the pipe. With a no moving parts, open flow tube design there is no pressure lost and practically no maintenance required

APPLICATION

The M1000 Electromagnetic Flow Meter has been specifically designed for industrial water/wastewater, machinery plants, vehicles and batching process applications. Available in sizes 1/4...20 inch (DN 6...500) and nominal pressures up to 1450 psi (100 bar), the meter is best suited for bidirectional flow measurements of fluid $> 5 \mu\text{S}/\text{cm}$ ($> 20 \mu\text{S}/\text{cm}$ for demineralized water). The amplifier can be integrally mounted to the detector, or if necessary, mounted remotely. The amplifier is housed in a Type NEMA 4X (IP67) enclosure and the measuring pipes are lined with material approved for drinking water: KTW/DVGW, NSF-61, WRAS, ACS. Several process connections are available, including DIN flanges, dairy pipe connections and TriClamp®.

FEATURES

- Accuracy $\pm 0.3\%$
- Flow range 0.03...12 m/s
- Sizes 1/4 ...20 in. (6...500 DN)
- LCD display
- Power supply 92...275V AC, 9...36V DC
- RS-232, RS-485 and RS-422 with Modbus® RTU
Optional Modbus TCP/IP, M-Bus or HART
- Integrated data logger

Detector Type Food Specifications

The sanitary detector was developed for the flow measurement of liquid food. This model is available with Tri-Clamp, DIN 11851, ISO2852 or BS4852 process connections or with any customer specified connections. The sanitary detector is delivered in a stainless steel housing and with PTFE lining.

Detector Type III Specifications

Thanks to its very short lay length, the Detector Type III is often the right alternative. Delivered with a PTFE liner, the Detector Type III has a standard nominal pressure of 580 psi (40 bar).

Amplifier Type ModMAG M1000 Specifications

| | |
|------------------------------|--|
| Type | ModMAG M1000 |
| Auxiliary Power | 92...275V AC (50 / 60 Hz), 13VA optional 9...36V DC, 4 W |
| Analog Output | 0/4...20 mA, $\leq 800 \text{ Ohm}$ / 0...10 mA Flow direction is displayed via separate status output |
| Digital Outputs | 2 open collectors, passive 32V DC, 0...100 Hz 100 mA, 100...10,000 Hz 20 mA, optional active Pulse, status, error messages |
| Digital Inputs | Totalizers and preselectors reset Positive Zero Return |
| Frequency Output | 10 kHz |
| Empty Pipe Detection | Separate electrode for empty pipe detection / field-tunable for optimal performance |
| Configuration | 3 external buttons |
| Interfaces | RS232, RS422, RS485, ModBus RTU, Optional ModBus TCP/IP, M-Bus or HART |
| Measuring Range | 0.10...39.37 ft/s (0.03...12 m/s) |
| Measuring Accuracy | 0.3% of reading $\pm 0.08 \text{ in./s}$ (2 mm/s) |
| Reproducibility | 0.1% |
| Flow Direction | Uni-directional and bi-directional |
| Pulse Length | Configurable up to 2000 msec |
| Outputs | Short-circuit-proof and galvanically separated |
| Low Flow Cutoff | 0...10% |
| Display | Graphical LCD 64 \times 128, backlight, actual flow rate, totalizers, status display |
| Housing | Powder-coated aluminum die casting |
| Mounting | Detector or remote wall mount |
| Protective Class | IP 67 |
| Cable Insert | Supply and signal cables 2 \times M20 |
| Remote Signal Cable | Up to 164 ft / 50 m |
| Coil Power | Pulsed DC |
| Altitude | 8202 ft (2500 m) |
| Ambient Temperature | -4...140° F (-20...60° C) |
| Humidity | 90% R.H. max |
| Approvals | NSF Listed: Models with hard rubber liner 4 in. size and up; PTFE liner, all sizes |
| Pollution Degree | 2 |
| Installation Category | II |
| Units of Measure | Gallons, ounces, MGD, liters, cubic meters, cubic feet, imperial gallon, barrel, hectoliter and acre-feet |

ModMAG M1000 Amplifier
in. (mm)

SIZE SELECTION

| Size | | Flow Range | |
|--------|-----|-------------------|-------------------------------|
| Inches | DN | US | Metric |
| 1/4 | 6 | 0.0134...5.4 GPM | 0.051...20.4 l/min |
| 3/10 | 8 | 0.0239...9.6 GPM | 0.090...36.2 l/min |
| 3/8 | 10 | 0.0373...14.9 GPM | 0.141...57 l/min |
| 1/2 | 15 | 0.084...33.6 GPM | 0.318...127 l/min |
| 3/4 | 20 | 0.149...60 GPM | 0.57...226 l/min |
| 1 | 25 | 0.233...93 GPM | 0.88...353 l/min |
| 1 1/4 | 32 | 0.382...153 GPM | 1.45...579 l/min |
| 1 1/2 | 40 | 0.60...239 GPM | 2.26...905 l/min |
| 2 | 50 | 0.93...373 GPM | 3.53...1414 l/min |
