

# PRODUCT OVERVIEW

## SERVOTOUGH Laser 3 Plus Combustion

HAZARDOUS AREA

GAS	MEASURES	APPLICATION
OXYGEN	PERCENT	PROCESS CONTROL
CARBON MONOXIDE	TRACE PPM	COMBUSTION
CARBON MONOXIDE + METHANE		

### SENSING TECHNOLOGY

TUNABLE DIODE LASER

### KEY APPLICATIONS

- Process heaters
- Incinerators
- Power stations
- Furnaces
- Thermal crackers
- Coal mills
- ESP protection
- Thermal oxidizers

### COMPACT COMBUSTION ANALYZER OPTIMIZED FOR CO, O<sub>2</sub>, OR CO + CH<sub>4</sub> MEASUREMENTS

#### UNRIVALLED PERFORMANCE

- Process temperatures up to 1300°C (2370°F) \*
- Low detection limit
- Negligible zero drift
- Calibration 12 months

#### FLEXIBLE

- Compact design
- Performs in high particulate environments
- Path lengths from 0.5m to 25m (1.6-82ft) \*
- Minimal cross interference
- Diverse mounting: ideal for ducts, stacks and reactor installations
- Wide range of applications

#### EASY TO USE

- Simple to install and operate
- Robust and reliable
- Space saving
- Digital communications Modbus over Ethernet
- User friendly interface and rapid disconnect for easy calibration

#### LOW COST OF OWNERSHIP

- Intuitive alignment for easy installation and maintenance
- Non-depleting TDL technology
- No moving parts, no consumables
- No sample conditioning system - reduced maintenance costs

#### BENCHMARK COMPLIANCE

- ATEX, IECEx and North American hazardous area approvals
- Certified for gases and dust
- Hardware safety integrity certification supports use in SIL 2 safety instrumented systems
- IP66
- CE approved

#### LEADING ANALYSIS

- Dual line oxygen monitoring for continuous oxygen readings from ambient to 1300°C (2370°F)
- Process temperature from 700°C (1292°F) up to 1300°C (2370°F) "hot oxygen analysis"
- Purge with instrument air, not nitrogen, due to the application of advanced spectroscopy techniques "hot oxygen analysis"

\* Application and measurement dependent

# PRODUCT OVERVIEW

## SERVOTOUGH Laser 3 Plus Combustion

HAZARDOUS AREA

### A REVOLUTIONARY APPROACH TO TDL GAS ANALYSIS

By combining the latest advances in hardware with leading-edge software processing, the SERVOTOUGH Laser 3 Plus is a revolutionary step forward for TDL gas analysis. Servomex has approached TDL analysis afresh, creating an analyzer a fraction of the size without compromising performance. The result is TDL analysis that is easier and faster to install - saving valuable space while enabling much greater installation flexibility.

### LOW MAINTENANCE, LOW COST-OF-OWNERSHIP

The next-generation ethos of the Laser 3 Plus works hard to reduce costs at all stages. In addition to the immediate advantages of TDL technology - a non-depleting measurement which requires no sample conditioning system - the Laser 3 Plus compact design greatly reduces installation time, with small, light intuitive alignment for easy installation and maintenance. Full ethernet communications for commissioning, diagnostics and trouble shooting.

### HIGH PERFORMANCE MONITORING

The hardware advances of the Laser 3 Plus are matched by advanced Wave Length Signal Modulated Spectroscopy processing software which eliminates drift over extended operational periods by automatically tracking on a sealed reference cuvette absorption line - Line Lock Technology. This robust tracking mechanism ensures a highly reliable and accurate operation over long periods, with calibration frequencies extended beyond twelve months for many applications.

The result is a sturdy, general purpose and hazardous area optimized design which ensures Laser 3 Plus can handle the most challenging of locations; including particulate-rich environments.

### LINE LOCK TECHNOLOGY - SAFE, SECURE, RELIABLE.

## SERVOTOUGH Laser 3 Plus Combustion

### SPECIFICATIONS

<b>GASES MEASURED</b>	O <sub>2</sub> , CO & CH <sub>4</sub> , CO				
<b>TECHNOLOGY</b>	Single Line Tunable Diode Laser Spectroscopy				
<b>PERFORMANCE</b>	Dual O <sub>2</sub>		Dual CO & CH <sub>4</sub>		CO
	O <sub>2</sub> †	Hot O <sub>2</sub> ‡	CO	CH <sub>4</sub>	
Detection limit (LDL) ‡	0.05% *	0.1% **	3ppm *	0.05% *	1ppm *
Min. range ‡	0-5%	0-5%	0-100ppm	0.5%	0-100ppm
Max. range ‡	0-21%	0-10%	0-10,000ppm	0.5%	0-10,000ppm
Max. temperature ‡	1300°C (2372°F)		1300°C (2372°F)	500°C (932°F)	1300°C (2372°F)
Optical path length ‡	0.5-25m (1.6-82ft)				
Max. pressure ‡	1.2 bar absolute (barA)				
Measurement update rate	5 readings per second				
Response Time T <sub>90</sub>	<10s #				
Drift (zero)	Negligible, <2% Full Scale Range (FSR) between calibrations				
Drift (span)	<4% FSR between calibrations				
Linearity	<1% FSR				
Repeatability	± detection limit or ± 1% of reading, whichever is the greater				
Calibration	Recommended every 12 months (up to 36 months, application dependent, consult Servomex)				
Maintenance	Recommended every 12 months				
Measurement availability	Optimal measurement availability via sealed reference cuvette and Servomex's unique line lock technology principle as standard.				

\* Detection limits are specified as the 95% confidence interval for 1m (3.3ft) optical path and gas temperature/pressure = to 25°C (77°F) /1 barA.

\*\* Detection limits are specified as the 95% confidence interval for 1m (3.3ft) optical path and gas temperature/pressure = to 1000°C (1832°F) /1 barA.

† Nitrogen purge only.

‡ Nitrogen or instrument air purge. Process temperatures >700°C (1292°F) only.

‡ Dependent on temperature path length and dust. Refer to Servomex for application specific performance and limits.

# Min. 1 second. Refer to Servomex, LDL and noise affected

<b>OPERATING ENVIRONMENT</b>	Ensure the effects of any local thermal radiation is considered when assessing the operating environment	
Operation	-20°C to +65°C (-4°F to +41°F)	
Mounting flange temperature	135°C (275°F)	
Storage temperature	-20°C to +65°C (-4°F to +41°F)	
Relative humidity	0-80% RH, non-condensing	
Altitude (maximum)	4,000m (13,120ft) 2,000m (6,560ft) for hazardous area variants	
Warm-up time	Functional within 10 minutes; Servomex recommend allowing 3 hours for the analyzer to stabilize	
Ingress protection	IP66, NEMA 4X	
<b>PHYSICAL</b>	<b>TRANSMITTER</b>	<b>RECEIVER</b>
Weight	3kg (6.6lbs)	2kg (4.4lbs)
Dimensions, WxDxH	131 x 164 x 303mm (5 1/8" x 6 1/2" x 12")	110 x 146 x 248mm (4 5/16" x 5 3/4" x 9 3/4")
Mounting	Flange to DN25, DN50, ANSI 1", 2", 3" or 4"	

SIGNAL OUTPUTS/INPUTS	
Analog output	1 isolated 4-20mA: 500Ω maximum as standard 1 x additional output (specification as above) may be fitted as an option
Output range	Analog output parameters freely selectable over measurement range
Alarms & relays	1 x status relay 1A at 30V dc/ac as standard 2 x additional outputs (specification as above) may be fitted as an option
Analog input (optional)	2 x 4-20mA inputs, maximum current 22mA; input impedance 50Ω
Digital communications	Modbus TCP/IP Ethernet (10 or 100 base)
UTILITIES	
Supply voltage	24V dc (18-30V dc)
Rated power	25W maximum
Purge gas	Dry and oil-free air (ISO 8573.1 Class 2-3) or N <sub>2</sub> 99.99, gas requirement and flow rate is application dependent
Zero gas	Typically nitrogen
Span gas	Application dependent
ACCESSORIES	
	Accessories such as alignment tools, calibration cell kits, purge panels and insertion tubes, isolation flanges and thermal spacers are available for specific applications - contact your local Servomex business center

## SAMPLE WETTED MATERIALS

	Application configurable from
Sample wetted seals	Viton® 70 (standard) or Chemraz® 505 (solvent resist) or equivalent
Flanges	Stainless steel (typically 316)†
Insertion tubes	Stainless steel (typically 316)†
Process flange gasket	Stainless steel/graphite composite
Process windows	Fused silica (standard) or Sapphire (application dependent)
Process window seal	Loctite® 595

† Other options are available, such as titanium CP-2 or Hastelloy® C276

## COMPLIANCE

HAZARDOUS AREA APPROVALS	For process hazardous area zones no greater than Zone 2 or Zone 21
ATEX (Europe)	 II 3G Ex ic ec nC op is IIC T4 Gc (-20°C ≤ Ta ≤ +65°C)  II 2D Ex tb [Ex op is] IIIB T135°C IP66 Db (-20°C ≤ Ta ≤ +65°C)
IECEx (International)	Ex ic ec nC op is IIC T4 Gc (-20°C ≤ Ta ≤ +65°C) Ex tb [Ex op is] IIIB T135°C IP66 Db (-20°C ≤ Ta ≤ +65°C)
North America	Class I, Division 2, Groups A-D Class II, Division 2, Groups F&G Class III Class I, Zone 2 Group IIC Ambient temperature range -20°C to +65°C, T4 IP66 and type 4X
EC DIRECTIVES	The SERVOTOUGH Laser 3 Plus complies with the EMC Directive, RoHS II, and all other applicable directives
ELECTRICAL SAFETY	Electrical safety to IEC 61010-1; the SERVOTOUGH Laser 3 Plus has also been certified for use in ordinary locations in USA and Canada

## CONFIGURATION

<b>ANALYZER FEATURES</b>	The SERVOTOUGH Laser 3 Plus measurement arrangement is configured to suit a specific application (see the supplementary configuration sheet), the following features may be configured independently
<b>Outputs and alarm options</b>	Standard: 1 x 4–20mA output and 1 x status relay Additional option card: 1 x 4–20mA output, 2 x status relays, 2 x 4–20mA inputs
<b>Certification (select one)</b>	Safe area/general purpose Gas: ATEX Cat 3 / IEC Ex zone 2 Dust: ATEX Cat 21 / IEC Ex zone 21 North American Class 1 Division 2 (gas and dust)
<b>Functional safety manual</b>	Demonstrates analyzer hardware compliance to SIL 2, IEC 61508
